DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on 8/28/03 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of US Patent No. 5,937,576 has been reviewed and is **NOT accepted**.

The (instant) application being disclaimed has not been identified; (Dkt. No. 8403.965 or 10/650,374).

The patent being disclaimed has been improperly identified since the number used to identify the conflicting patent being disclaimed is incorrect. The correct number is 6,672,005.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The disclosure is objected to because of the following informalities:

Paragraph [0001] should be updated to reflect the patented status of US Application No. 10/447,601.

Appropriate correction is required.

Claim Objections

Claim-7 is objected to because of the following informalities:

On line-3 of the claim; "of tab" should be —of the tab—.

Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,672,005.

Although the conflicting claims are not identical, they are not patentably distinct from each other because; the decorative assembly of the instant application (instant independent claims 1 and 9) and the floral holding material of the instant application

Art Unit: 3644

(instant independent claims 5 and 11) are broadly encompassed by the decorative assembly of the conflicting '005 patent (claims 1 and 9) and the floral holding material of the conflicting '005 patent (claims 5 and 11).

Furthermore, instant dependent claims 2, 4, 7 and 8 are encompassed by conflicting '005 dependent claims 2, 4, 7 and 8.

Finally, instant repeating dependent claims 3, 6, 10 and 12 are identical to repeating conflicting '005 dependent claims 3, 6, 10 and 12.
